Frontend Developer and Informatics Engineering graduate (GPA 3.75) building web applications with Angular, Ionic, React, Next.js, and TypeScript. Currently developing an internal enterprise platform at PT Bakrie Autoparts, with experience in REST API integration and full-stack projects.

## EXPERIENCE

**Frontend Developer (Apprenticeship)** *September 2026 – Present*
**PT Bakrie Autoparts - Bekasi, West Java**

- Build frontend features for ERIS, an internal multi-application enterprise platform, using Angular, Ionic, and TypeScript
- Implement authentication, routing, session guards, and role-based access control in the UI
- Integrate REST APIs (auth, users, roles) and test CRUD endpoints with Postman, collaborating with a mentor and a teammate

**Freelance Software Engineer** *July 2023 – August 2026*
**Self-Employed**

- Developed, debugged, maintained, and optimized frontend for client web projects using HTML, CSS, and JavaScript
- Delivered a custom CMS for a village government: resident profiles, demographic data, and local news publishing through an admin panel
- Managed client requirements from initial briefing to final delivery, ensuring code scalability and functionality

**Frontend Developer Student** *August 2023 – December 2023*
**Kampus Merdeka - Remote**

- Completed a 918-hour certified independent study program (Kampus Merdeka, Ministry of Education) covering front-end and back-end web development
- Built responsive web applications and REST APIs with Node.js, with code managed on GitHub

## SKILLS

- **Frontend Development**: Angular, Ionic, TypeScript, JavaScript, React, Next.js, Tailwind CSS
- **Backend & Data**: Node.js, Express.js, REST API, JWT, PostgreSQL, MySQL, Supabase
- **Tools & Testing**: Git, GitHub, Postman, Jest, AI-assisted development
- **Data Science & Analytics**: Python, Machine Learning, Data Mining, Isolation Forest
- **Soft Skills**: Team Work, Leadership, Technical Troubleshooting, Cross-Cultural Communication
- **Languages**: Bahasa Indonesia (native), English (TOEFL ITP 483)

## EDUCATION

**Malikussaleh University - Lhokseumawe, Aceh** *September 2021 – January 2026*
Bachelor of Informatics Engineering | GPA: 3.75
Thesis: "Clustering Analysis of Rice Productivity Areas in Deli Serdang using the Isolation Forest Algorithm", applying data mining and preprocessing to group rice productivity data across 22 districts

## PROJECTS

**NusaMart | Next.js, TypeScript, PostgreSQL, Prisma**

- Built a production-style online store with Next.js, TypeScript, PostgreSQL, and Prisma, covering category browsing, flash sales, and a full checkout flow

**CollabSpace | Next.js, TypeScript, Supabase**

- Built a Slack-style team workspace with real-time channel messaging, presence, and notifications

**Clinic Information System | React, Express.js**

- Built an information system with a REST API for managing patient records and appointment scheduling

## PUBLICATION

**Academic Publication and Presenter at the Seminar Nasional Teknologi Informasi dan Teknik Informatika (SENASTIKA) 2024**

- Co-authored and presented "Comparison of Accuracy of Household Electricity Consumption Prediction Using Single Exponential Smoothing and Single Moving Average Methods" at the Seminar Nasional Teknologi Informasi dan Teknik Informatika (SENASTIKA) 2024

## CERTIFICATIONS

- Productivity with AI Bootcamp - Badan Ekraf Digital Talent *2026*
- Fundamental Frontend Web Development - Dicoding Indonesia *2026*
- SOLID Programming Principles - Dicoding Indonesia *2026*
- TOEFL ITP (Score: 483) - UNIMAL Language Center *2026*
- Frontend Web Developer Expert - Dicoding Indonesia *2023*

## ORGANIZATION

**Secretary General & Project Leader** *January 2024 – December 2024*
**UKM LDK Al-Kautsar**

- Led the "International Collaboration Mobility Students and Community Service", a 2-day program between Universitas Malikussaleh (Indonesia) and Universiti Sultan Zainal Abidin (Malaysia), with seminars and academic sessions for 250+ participants
- Managed administration and evaluations for 25+ other activities
